

Dec 12/21. Update to KRN Shareholders

Dear Fellow Shareholders,

Thank you, thank you, thank you. Your actions have brought the KRN vote fraud issues to the forefront in all regulatory agency offices and banks in Canada, USA and G7 globally. Wow!

Since my request for complaints from other shareholders who may have registered complaint(s) to the appropriate regulatory authorities, I can confirm that over 139 complaints have been filed this week representing more than 225 shareholders. Keep them coming.

As you read this week's postings on KRNShareholders.com, the complainants are painting a very clear picture of regulatory agencies simply not doing their job. My cousin best described their responses as a modern day replica of the famous Abbott and Costello "Who's On First" sketch or better yet, Seinfeld's George Costanza and the "Penske Files".

All of the regulatory agencies have received proof of the actual votes changed at the 2018 AGM. This information will be posted on the website shortly.

Our situation has been described by the court as "Corporate Terrorism" and needs to be brought to the attention of those we elected. The provincial governments oversee the provincial regulatory bodies entrusting them to protect us against fraud and corruption in the securities markets.

All that we are seeking is a fair and complete investigation by a neutral third party. The courts have the ability to correct this entire mess in minutes.

Please email this link: www.krnshareholders.com to your federal and provincial members of Parliament **and use REPLY ALL to as you include your Federal and Provincial members of Parliament on your email so that all agencies are on the same page.**

Watch the website regularly to ensure that you are up on the latest posts and happenings.

Thank you again!.....Let's keep the ball rolling.

Stan Phinney
